

Online Safety

ABN-W14 | Issued August 2026 | Review August 2027

Technology is used purposefully, safely and only where it benefits children and nursery communication.

Nursery devices

- Staff personal phones are stored away from children while working.
- Only authorised nursery tablets and the nursery phone are used for photographs, observations and approved communication.
- Devices are password protected, updated and accessed only by authorised staff.
- Children are supervised whenever technology is used.

Tapestry

Staff use individual Tapestry logins. Parents must keep their login secure and must not share or repost images containing other children. Please tell us immediately about unauthorised access or an accidental upload.

Photographs and sharing

We obtain consent for optional uses such as the website or publicity. Images are appropriate, securely stored and not taken on personal devices. Safeguarding recording does not depend on marketing consent.

Helping children

Children learn simple, age-appropriate messages: ask an adult, be kind, stop if something feels worrying and tell a trusted adult.

Concerns

Any harmful content, suspicious contact, data breach or online safeguarding concern is reported immediately to Caroline and managed under safeguarding and data-protection procedures.

Questions or concerns

Questions? Contact Caroline Daniel, Owner/Manager, on 07720 313418 or admin@appleblossomnursery.co.uk.
